-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 04 March 2005.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Art Unit: 2115

1. This action is in response to the amendment received on March 4, 2005. Claims 29-31 are pending. Claims 29-31 have been added. Claims 1-28 have been canceled.

2. The rejection of the claims under 35 U.S.C. 112, first paragraph has been withdrawn in view of the new claims presented in the above amendment.

3. The text of those sections of Title 35, US Code not included in this action can be found in a prior Office Action.

4. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

5. Claims 29-31 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1 and 8 of U.S. Patent No. 6,804,791. Although the conflicting claims are not identical, they are not patentably distinct from each other because they are directed to substantially the same invention. Claims 29-31 correspond to claims 1 and 8 of the patent in that the recited CPU/processor in claims 29-31 correspond to the second processing section/CPU in claims 1 and 8 of the patent. The external processor and block of claims 30 and 31 correspond to the functions performed by the first processing section in claim 1 of the

Art Unit: 2115

patent. Claims 29-31 broadly recite the invention of claims 1 and 8 of the patent in that they are directed mainly to the second processing section (CPU/processor) and its operations recited in claim 1 without explicitly reciting how the second processing section (CPU/processor) transitions between the stop state and the operation state. The operations performed by the CPU/processor of claims 29-31 are substantially the same as the operations performed by the second processing section of claim 1 of the patent. Both recite a CPU (second processing section) having an operation state and a stop state that operate in accordance with a clock. Both recite receiving external data/information while the CPU (second processing section) is in the stop state. Both recite that the CPU (second processing section) does not always make a transition from the stop state to the operation state due to data/information being input (claim 1 recites determining whether it is necessary to initiate the second processing section and initiating the transition if necessary). Both recite that the CPU (second processing section) processes (performs a predetermined process) the data/information when it is in the operation state. It would have been obvious to one of ordinary skill in the art that the second processing section could be made to transition between a stop state and an operation state differently that explicitly recited in claim 1 of the patent.

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
